

PROFESSIONAL SUMMARY

Full Stack Engineer with 5+ years of experience building scalable, high-performance SaaS applications using **React.js, Next.js, Vue.js, TypeScript, Node.js,** and **Python**. Experienced in delivering **end-to-end product features, designing internal platforms, optimizing backend performance, implementing secure authentication systems,** and **supporting enterprise-scale products**. Passionate about building maintainable software, improving developer experience, and leveraging **AI-assisted development tools** such as Claude Code to accelerate delivery while maintaining production-quality engineering standards.

KEY HIGHLIGHTS

- Delivered **end-to-end full-stack features** using React, Node.js, and Python for **40+ enterprise clients**.
- Modernized authentication** with Better Auth, enabling multi-tenancy, audit logging, and SOC2 compliance.
- Optimized backend performance** by contributing to async FastAPI services and scalable API architecture.
- Built internal platforms** for workflow automation, client onboarding, and operational efficiency.
- Accelerated development** using **Claude Code** while maintaining code quality through testing and reviews.

KEY SKILLS

- Frontend Development:** React.js, Next.js, Vue.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Material UI, Responsive Design, SSR, SEO Optimization, Bug fixing and troubleshooting
- Backend & Tools:** Node.js, NestJS, Python, FastAPI, REST APIs, Authentication, Docker, AWS, Google Cloud Storage, CI/CD
- Testing & QA:** Jest, React Testing Library, PyTest, Unit Testing, Performance Optimization, Debugging, Code Reviews
- Version Control, Collaboration & Tools:** Git, GitHub, GitLab, JIRA, Claude Code, Agile, Product Development Lifecycle
- Soft Skills:** Leadership, Project Management, Problem Solving, Attention to Detail, Creativity, Adaptability, Time Management

WORK EXPERIENCE

Full Stack Engineer, **AdeptMind Inc. (Remote) | Toronto, Canada** Dec 2022 – Present

- Designed and shipped end-to-end full-stack features** using React, Next.js, TypeScript, Node.js, and Python for enterprise retail products serving **40+ enterprise clients**, including Search Sandbox, internal tooling, and SEO-optimized SSR applications.
- Contributed to authentication modernization**, migrating from NextAuth to Better Auth with Organizations, Teams, audit logging, multiple authentication methods, and self-service client administration to support multi-tenancy and **SOC2 compliance**.
- Implemented security and platform improvements** by replacing shared API credentials with user-scoped hashed API tokens, lifecycle management, audit logging, TLS enforcement, and secure token rotation.
- Contributed to backend performance optimization**, migrating FastAPI services to asynchronous architecture with async connection pools while enhancing backend APIs and improving production throughput and response times under peak traffic.
- Built internal operations tooling**, integrating Prefect workflows, broker job management, centralized page configuration, audit trails, and workflow automation to improve operational efficiency and reduce engineering overhead.
- Improved application reliability and engineering productivity** by implementing resilient retry mechanisms (TanStack Query & RxJS), expanding automated test coverage with Jest and React Testing Library, participating in code reviews, and leveraging Claude Code for AI-assisted development.

Key Achievements:

- Delivered high-impact features** for **40+ enterprise clients** while consistently meeting project timelines.
- Contributed to platform modernization, SOC2 readiness, and developer productivity** through security, performance, and internal tooling initiatives.

SDE-1 (Software Development Engineer), **Myclassroom Learning Services Pvt. Ltd. | Noida, India** Sept 2021 – Nov 2022

- Developed and deployed the complete **UI** for **myseat.mclassroom.digital** ([Link](#)), enhancing **post-login** user experience
- Delivered a **market-ready product by fixing bugs** and integrating APIs using React JS, as per the design specifications
- Developed **lead-capturing landing pages** for **AIMS JEE** and **AIMS NEET**, improving lead tracking efficiency ([Link](#) | [Link](#) | [Link](#))
- Integrated **MoEngage Web SDK** to gather valuable **analytics**, supporting business decision-making
- Improved existing applications by developing **React-based modules**, enriching the **user experience**

Key Achievements:

- Developed high-traffic landing pages that increased **lead conversion rates**
- Deployed customised landing pages for clients, resulting in higher **customer engagement**

CERTIFICATIONS

- Git and GitHub Master Course** - Udemy (July 2021)
- Introduction to Python** - Ducat (June – August 2019)

EDUCATION

- MBA (IT Project Management)**, Amity University, India | July 2023 – July 2025
- B. Tech in Computer Science**, Maharaja Agrasen University, Himachal Pradesh | August 2018 – June 2022

PROJECT CONTRIBUTION (PERSONAL)

- Artist Portfolio Website** (July 2021) [Link](#) | Created a portfolio website for **Anuv Jain** using **HTML, CSS,** and **JavaScript** to showcase his biography, music, and events in one place, offering a seamless and responsive user experience

AWARDS & RECOGNITIONS

- Winner, Smart India Hackathon 2020 (Hardware Edition):** Led the development of a **gamified smart dustbin**, integrating **AI, ML, IoT** for waste segregation, and a quiz-based rewards website
- Runner-Up, Smart India Hackathon 2019 (Hardware Edition):** Developed an **aquatic drone** for monitoring water quality in the **river Ganga**, utilising **IoT, Bluetooth,** and **Wi-Fi** technologies
